The SportChassis Difference

SportChassis is an American brand of heavy duty pickups whose name goes hand and hand with luxury, strength, and pride. SportChassis LLC is recognized by the United States Department of Transportation as the Original Equipment Manufacturer of the SportChassis, which is its own vehicle line/make. What this means to you the customer is: certainty about the value of your SportChassis when insuring or reselling, piece of mind knowing that you can get bumper to bumper warranty and service work at any Freightliner service point, and you can expect an overall greater satisfaction of ownership with the SportChassis product.

CHOOSE THE HAULER THAT'S RIGHT FOR YOU...

The SportChassis product unites luxury crafted amenities with the power and durability of a single axle Freightliner chassis, which requires no special operator's license. The ride enhancement package, an automatic push button transmission, leather seating, keyless entry, and a state of the art multimedia system are just a few of the luxury features you will find in every SportChassis. The SportChassis product is available in six standard paint colors and three upholstery color schemes. There are over 250 upgrades available such as four-wheel drive, a brush guard, perimeter lighting, and in-cab Wi-Fi to customize units. The luxurious SportChassis cab is available in three different hauler body styles, each ready to tackle a multitude of needs.

SportChassis P2-350

The transition from pulling your cargo safely down the highway to making a grocery run has never been smoother; the SportChassis P2 satisfies every need with one vehicle. This Heavy Duty Pickup combines a fully functional pickup truck with a durable, heavy duty chassis. With the SportChassis P2 you get the truck you are accustomed to with the safety, comfort, and peace of mind that you deserve.

SportChassis RHA114-350

When pulling any sort of large trailer with a SportChassis much of the stress is eliminated. The RHA114-350 utilizes a Cummins ISC 350hp engine with an Allison automatic transmission. The RHA114 is equipped with the aluminum SportChassis flatbed which has sealed storage compartments, a cargo tie down system, and an air supply connection. With the RHA114-350 there is almost nothing you cannot do.

SportChassis RHA114-450

The RHA114-450 is built on the heavier, class seven Freightliner M2 chassis. With the impressive 1650lb-ft of torque, and its 53,000lb combined weight rating, the upsized RHA114-450 effortlessly handles the heaviest of loads. By utilizing a true air brake system, a powerful Detroit Diesel 450hp DD13 and an Allison TRV 4000 drive train, the RHA114-450 gets the job done right.

SportChassis COMPARISON

	P2-350 	RHA114-350 	RHA114-450 
Bed	Steel/Pickup	Aluminum/Flat	Aluminum/Flat
Motor (horsepower / torque)	Cummins ISC (350HP / 1050)	Cummins ISC (350HP / 1050)	Detroit Diesel (450HP / 1650)
Transmission	Allison TRV 3200 (6 speed automatic)	Allison TRV 3200 (6 speed automatic)	Allison TRV 4000 (6 speed automatic)
Braking System	4 wheel ABS Hydraulic Disc	4 wheel ABS Hydraulic Disc	4 wheel ABS Airbrake System
Wheelbase (inches)	174	187	187
Dimensions (length / width)	262 / 99	277 / 99	277 / 99
